

Gas Vent Free Fireboxes

VERSATILE OPTIONS FOR YOUR HOME

ENJOY THE FIREPLACE YOU'VE ALWAYS WANTED

Magnum MCF Series

Monessen offers one of the most diverse lineups of gas vent free fireplaces available, making it easy to find the right look for your home. Enjoy beautiful flames, excellent heating and a customized look, plus these added benefits:

SAVE ENERGY AND MAXIMIZE HEAT

Vent free gas fireplaces (available in natural gas and propane) are a safe, green and energy efficient way to add heat to your home — in fact, they're 99.9% energy efficient. Because they are vent free, none of the heat gets lost up a vent, flue or chimney. Instead, fuel dollars get transformed into heat-warming energy. Plus, you can always be assured of a heat source, even in the event of a power outage.

INSTALL IT WHERE YOU WANT IT

Because vent free fireplaces are designed to be installed and operated without a chimney, flue or vent, they can be installed in locations in your home where it would be impossible to install a vented fireplace. They provide the most economical installation, only requiring a connection to a gas line.

CREATE YOUR OWN LOOK

With multiple facing and firebrick options available, you can tailor the look of the fireplace to suit your tastes and décor.

YOU'RE IN THE CLEAR

Monessen vent free fireplaces allow for zero clearance installation, which means they may be installed flush against any combustible surface such as drywall or wood. This gives you added flexibility and helps save installation dollars when deciding where to install your fireplace, whether on an interior or exterior wall.

(It is important to remember that the appliance should be sized to fit the area in which it is to be installed and must meet any additional regional or local requirements.)

COMPLETE YOUR LOOK

Monessen offers a selection of vent free log sets (sold separately) that are a perfect complement to your new fireplace. Ask your dealer for details.

Pictured on cover:
Lo-Rider LCF Series

EXPANSIVE VIEWING AREA WITH THE TALLEST FIREPLACE OPENING AVAILABLE

Lo-Rider LCUF Series

For a true masonry look, the Lo-Rider Series features a low profile hearth, so the firebox appears to nearly rest on the floor, providing the tallest fireplace opening and a truly expansive viewing area.

Quick Look:

- Tallest opening available for full view of fire
- Low profile hearth
- True masonry look
- Available facing options include Perimeter Trims, Classic Arched Faces, Cabinet Doors with Screen and Filigree Panels

Lo-Rider LCUF Series

SPECIALTY OPTION

Lo-Rider Designer Series

The Designer Series is available in See-Thru, Peninsula and Corner models, adding style and warmth to your rooms while maintaining a contemporary feel. And, the industry exclusive louverless design provides a clean exterior for an ultra sleek look.

Quick Look:

- Tallest opening available for full view of fire
- Radiant face design with heat circulating air ducts for optional blower
- Low profile hearth
- True masonry look

Interior Firebrick

Refractory Herringbone

Available log set may differ from log set pictured.

Lo-Rider Designer Series (See-Thru model pictured)

A photograph of a living room interior. In the foreground, a plush red armchair with a patterned pillow sits on a wooden floor. Behind it, a large window with white trim looks out onto green trees. To the right, a white fireplace is partially visible. A black banner with white text is overlaid at the top of the image.

PERFECT FOR LARGER ROOMS

Magnum MCF Series

This firebox offers a radiant design and taller opening to help warm larger rooms. Finish your fireplace right up to the firebox and select interior and exterior style options for a custom look.

Quick Look:

- Radiant face design with heat circulating air ducts for optional blower
- True masonry look
- Available facing options include Perimeter Trims, Classic Arched Faces and Cabinet Doors with Screen
